without Ball

**RAP-465LU**  
Left Mirror  
without Ball

**RAP-465RU**  
Right Mirror  
without Ball

# RAM® Tough-Mirror™

## FEATURES

### GENUINE RAM® COMPONENTS

As the only rugged motorcycle mirrors on the market consisting entirely of 100% genuine RAM® ball & socket components, you can ensure a secure connection throughout your riding experience.

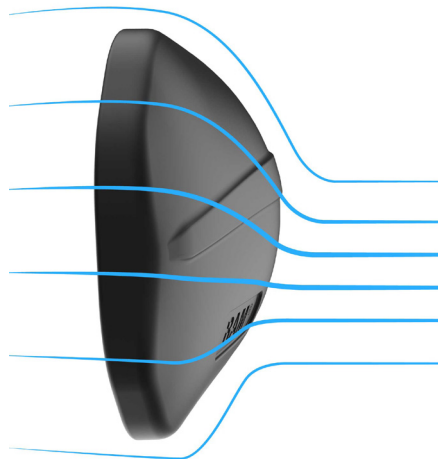

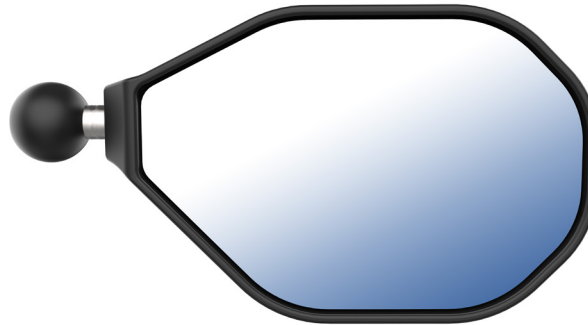

### AERODYNAMIC SHAPE

The sleek shape of the RAM® Tough-Mirror™ was designed with aerodynamics in mind to reduce wind resistance, enabling riders to experience enhanced stability and fuel efficiency. By reducing drag, the streamlined design of these motorcycle mirrors not only complement the aesthetics of the motorcycle, but also contributes to a more enjoyable and safer ride.

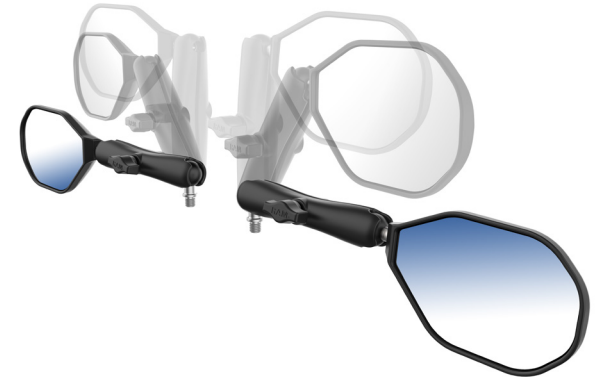

### MORE MIRROR WHERE IT COUNTS

Designed by the RAM® Mounts in-house engineering team in Seattle, Washington, the RAM® Tough-Mirror™ offers industry-leading visibility with its large mirror surface area; made with stainless steel and high-strength composite components that are backed by a lifetime warranty and built to withstand the most rugged environments, RAM® has you covered.

### ADJUSTABILITY FOR ANY RIDING STYLE

Built for adventure, the RAM® Tough-Mirror™ is the perfect addition to any motorcycle in any environment — whether you're cruising down the interstate or pushing limits on technical trails. With RAM® ball and socket technology, adjusting your mirrors has never been easier.

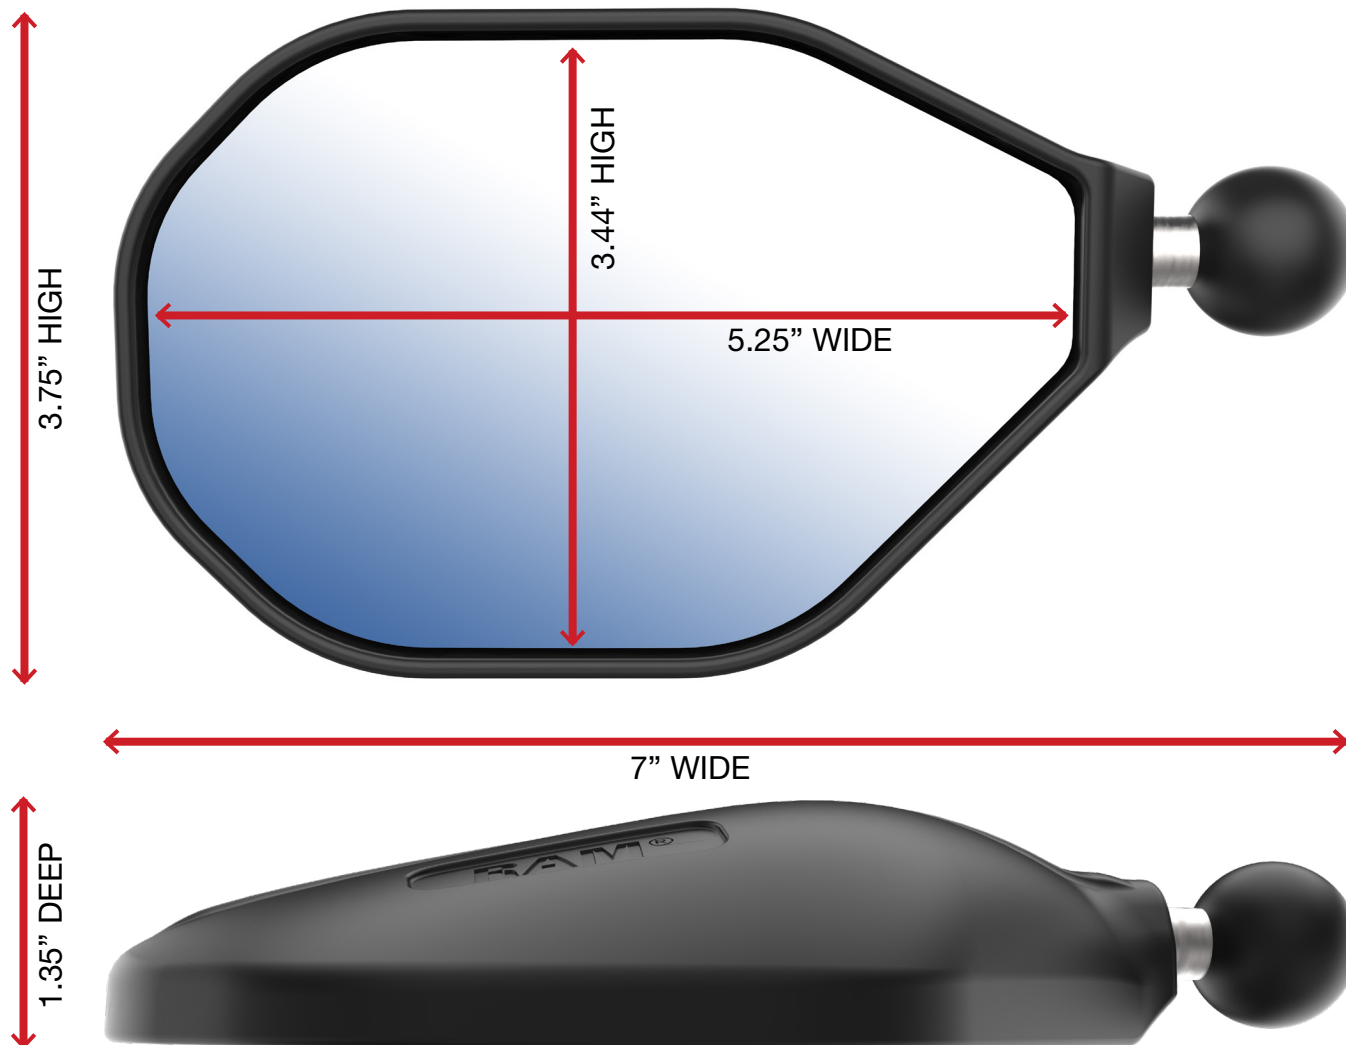

### RAM® RUGGED

The RAM® Tough-Mirror™ features a composite shell specifically designed to withstand glancing blows with ease. Its impact-resistant construction absorbs and disperses force, ensuring durability and safety. With corrosion resistance and a lightweight design, it provides reliable visibility in rugged conditions while improving visibility.
